

K-GRUNDEJEKTION SBP-C ELK

Basic ejector »SBP-C« with blow-off valve and electronic vacuum switch, with integrated silencer

HANSA FLEX

Caratteristiche

Caratteristiche Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%)
Connection of compressed air and vacuum with push-in coupling
Basic housing with connection facility for a vacuum switch
Maximum suction capacity with minimum compressed air consumption
Minimum size, low weight
Various power ratings for optimised air consumption

Applicazione For universal use in handling systems with very high dynamic movements
Handling all kinds of air-tight components
For use in separation systems where space is restricted.
Construction of ejector blocks for centralised or decentralised individual control of suction pads.

Sistema ugello Brass

Attacco Push-in coupling

Silenziatore Plastic

Corpo base Impact-resistant plastic

Nota

Altri dati su richiesta.

Descrizione

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.
