

K-SSV BR

Angle-seat valves with piston actuator

HANSA FLEX

Caratteristiche

Pressione differenziale	0 - 16 bar
Temperatura del fluido	-10 °C to +180 °C
Attacco aria comando	G 1/8
Temperatura fluido di comando	max. +60 °C
Temperatura ambiente	-20 °C to +70 °C
pressione statica ammessa	Max. 16 bar
Sede valvola	Bronze
Connettore	Stainless steel
Testa di comando	Polyamide (glass fibre-reinforced)
Pistone	Nickel-plated brass (DN 15 to DN 32), PBT + GF 30% (DN 40 to DN 50)
Mandrino	Stainless steel
Materiale di tenuta	PTFE

Nota

G thread acc. to DIN EN ISO 228-1, with ISO flange plate (acc. to ISO 5211)

For use on devices that have to be vented whenever they are turned off, either because of safety regulations or for technical reasons. The pneumatic devices are disconnected from the system and simultaneously vented each time they are shut off.

Altri dati su richiesta.

Descrizione

Angle-seat valves with external pilot control and a self-aligning valve disc for neutral (bronze body) or corrosive (stainless steel body) media. Very high flow due to angled seat design, Water hammer prevented by fluid entry under the disc, Suitable for vacuum operation (low vacuum), NAMUR interface on the piston actuator. 3/2 and 5/2-way valves can be mounted directly.

Informazioni supplementari

Other versions e.g. for steam on request

Information on max. operating differential pressures apply for air, gas, corrosive aggressive media, water
