

K-GRUNDEJEKTION SBP-C

Basic ejectors »SBP-C« with blow-off valve, with integrated silencer

HANSA FLEX

Savybės

Savybės	<p>Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%)</p> <p>Connection of compressed air and vacuum with push-in coupling</p> <p>Basic housing with connection facility for a vacuum switch</p> <p>Maximum suction capacity with minimum compressed air consumption</p> <p>Minimum size, low weight</p> <p>Various power ratings for optimised air consumption</p>
----------------	--

Panaudojimas	<p>For universal use in handling systems with very high dynamic movements</p> <p>Handling all kinds of air-tight components</p> <p>For use in separation systems where space is restricted.</p> <p>Construction of ejector blocks for centralised or decentralised individual control of suction pads.</p>
---------------------	--

Purkštukų sistema	Brass
--------------------------	-------

Jungtis	Push-in coupling

Aprašas

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.
