

K-AN 302-60

Lock AN 302-60

HANSA FLEX

Savybės

Panaudojimas Screw locking without pretreatment

Tvirtumas High strength

Klampa Medium viscosity

Pastovi temperatūra -60 °C to +180 °C

Nuoroda

Daugiau duomenų pagal užklausimą.

Aprašas

High-strength bonding of passive materials such as stainless steel or aluminium, no pre-treatment required. Thermal stability: -60 °C to +180 °C- Reduced assembly time- High strength- Handling strength: just 2 to 5 minutes- Final strength: just 2 to 4 hours- No need for pre-treatment with activator and therefore no additional emissions due to solvents
