

# K-AN 302-60

Lock AN 302-60

**HANSA FLEX**

## Savybės

**Panaudojimas** Screw locking without pretreatment

**Tvirtumas** High strength

**Klampa** Medium viscosity

**Pastovi temperatūra** -60 °C to +180 °C

## Nuoroda

Daugiau duomenų pagal užklausimą.

## Aprašas

High-strength bonding of passive materials such as stainless steel or aluminium, no pre-treatment required. Thermal stability: -60 °C to +180 °C- Reduced assembly time- High strength- Handling strength: just 2 to 5 minutes- Final strength: just 2 to 4 hours- No need for pre-treatment with activator and therefore no additional emissions due to solvents
