

# K-ENDPLATTEN V

## End plate for HDM valve terminal

### Īpašības

|                               |   |
|-------------------------------|---|
| <b>Darba vides</b>            | Filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous. |
| <b>Darba spiediens</b>        | Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard)                      |
| <b>Regulēšanas spiediens</b>  | 3 - 7 bar   |
| <b>Temperatūras diapazons</b> | -10 °C to +60 °C  |
| <b>Caurplūde</b>              | 200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8)  |
| <b>Vadību skaits</b>          | Max. 16 (e.g. 16 spring return valves)  |
| <b>Funkcija</b>               | Blind (terminates the system)   |
| <b>Manuāla palīg vadība</b>   | Latching (bistable), Monostable (non-latching) version also available on request                    |
| <b>Jaudas patēriņš</b>        | 0.6 W per pilot   |
| <b>Aizsardzības veids</b>     | IP 65   |

### Norāde

Citi dati pieejami pēc pieprasījuma.

### Apraksts

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

### Papildu informācija

Important: The scope of supply does not include a connector. Please order separately.

### Izstrādājums

| Apzīmējums     | Funkcija                      |
|----------------|-------------------------------|
| K- 07 15 22 50 | Blind (terminates the system) |
