

K-ZFL VENTILINSEL HDM

Intermediate plates for HDM valve terminal

Eigenschappen

Middelen	Filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous.
Werkdruk	Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard)
Regeldruk	3 - 7 bar
Temperatuurgebied	-10 °C to +60 °C
Debiet	200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8)
Aantal aansturingen	Max. 16 (e.g. 16 spring return valves)
Handmatige hulpbediening	Latching (bistable), Monostable (non-latching) version also available on request
Opgenomen vermogen	0.6 W per pilot
Beschermingsklasse	IP 65

Aanwijzing

Andere gegevens op aanvraag.

Beschrijving

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

Extra informatie

Important: The scope of supply does not include a connector. Please order separately.

Artikel

Aanduiding	Functie
K- 07 15 22 51	With additional pilots and exhausts
K- 07 15 22 52	With separate pilots (for multi-pressure systems)
K- 07 15 22 44	With separate exhausts (for multi-pressure system)
