

# K-AN 302-60

Lock AN 302-60

**HANSA FLEX**

## Eigenschappen

<b>Toepassing</b>	Screw locking without pretreatment
<b>Mechanische sterkte</b>	High strength
<b>Viscositeit</b>	Medium viscosity
<b>Temperatuurbestendig</b>	-60 °C to +180 °C

## Aanwijzing

Andere gegevens op aanvraag.

## Beschrijving

High-strength bonding of passive materials such as stainless steel or aluminium, no pre-treatment required. Thermal stability: -60 °C to +180 °C- Reduced assembly time- High strength- Handling strength: just 2 to 5 minutes- Final strength: just 2 to 4 hours- No need for pre-treatment with activator and therefore no additional emissions due to solvents
