

### Właściwości

|                           |                           |
|---------------------------|---------------------------|
| <b>Cechy szczególne</b>   | twierdść: ok. 77° Shore A |
| <b>Warstwa wewnętrzna</b> | miękkie PCW               |
| <b>Wkład</b>              | brak                      |
| <b>Warstwa zewnętrzna</b> | miękkie PCW               |
| <b>Kolor</b>              | przezroczysty             |
| <b>Temperatura min.</b>   | -5 °C                     |
| <b>Temperatura max.</b>   | 60 °C                     |
| <b>Czynniki robocze</b>   | woda<br>powietrze         |

### Wskazówka

Podane ciśnienia odnoszą się do krótkotrwałego obciążenia ciśnieniowego bez uderzeń przy +20°C.
