

K-HS RD

Unidirectional banjo valves, pneumatic release, port 2 with female thread

HANSA FLEX

Właściwości

| | |
|-------------------------|--|
| Ciśnienie pracy | 0.3 - 10 bar |
| ciśnienie sterujące | 0.5 - 2.5 bar, depending on operating pressure |
| Temperatura czynnika | max. 60 °C |
| Położenie montażowe | Any. The ring piece must be positioned before the valve is tightened |
| Materiał | mosiądz niklowany |
| Materiał uszczelniający | Perbunan |

Wskazówka

Opis

For stopping and positioning the cylinder movement: If a control signal is present at port 3 (see drawing), air can flow to and from the cylinder. If no control signal is present, the cylinder exhaust air is shut off by the unidirectional valve.
The cylinder is stopped. Releasable unidirectional valves are screwed directly onto the cylinder instead of the normal pipe connections.
