

# K-GMM 2

Glycerine-filled pressure gauges, CrNi steel type

**HANSA FLEX**

## Właściwości

|                       |                                                                                                                         |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------|
| Typ                   | 233.30                                                                                                                  |
| Wykonanie             | Glycerine-filled Bourdon-tube pressure gauge, CrNi steel type, with solid baffle wall and blow-out (safety housing)     |
| Przeznaczenie         | For gaseous or liquid, corrosive and crystallising media which do not have high viscosity, also in corrosive atmosphere |
| Klasa jakości         | 1,6 (Ø 63 mm), 1,0 (Ø 100 mm)                                                                                           |
| Temperatura czynnika  | max. +100 °C                                                                                                            |
| temperatura otoczenia | -20 °C do +60 °C                                                                                                        |
| Obudowa               | CrNi steel                                                                                                              |
| wziernik              | Laminated safety glass Ø 63 = Polycarbonate                                                                             |

## Wskazówka

Dalsze informacje na zapytanie.

## Artykuł

| Oznaczenie     | Zakres pomiarowy | Ø (mm) | Przyłącze |
|----------------|------------------|--------|-----------|
| K- 07 20 07 03 | -1 / 0.0 bar     | 63,0   | G 1/4"    |
| K- 07 20 07 04 | 0 - 4.0 bar      | 63,0   | G 1/4"    |
