

K-BKR FEINEINSTELLUNG

Ball valves

HANSA FLEX

Características

Pressão operacional	Max. 40 bar
Temperatura operacional	-15 °C to +100 °C
Rosca Descrição	G thread acc. DIN EN ISO 228-1
Carcaça	Nickel-plated brass (outside); Brass with a bare metal surface (inside)
Volante	Plastic
Esfera	Chrome-plated brass
Vedação da esfera	PTFE
Vedação do fuso	NBR

Nota

Outras indicações a pedido.

Descrição

Brass ball valves in the standard series with fine adjustment. Unlike our classic standard ball valves (open-close function), this model features a special stem technology that allows finely modulated opening and closing of the line. The flow rate can be regulated extremely precisely as a result. The cock is made of low-lead brass with a bare brass surface on the inside. It is thus safe to use with drinking water. This valve complies with the European standard EN 13828 and the working paper DVGW W 570.
