

K-STOPPVENTILE IG

Stop valves, ports 2 and 3 with female thread

HANSA FLEX

Características

| | |
|-----------------------|--|
| Pressão de trabalho | Max. 10 bar |
| Pressão de controle | 1 - 5 bar, depending on operating pressure |
| Temperatura do fluido | max. 70 °C |
| Posição de montagem | Qualquer. Olhal giratório 360° mesmo após o aperto |
| Material | Latão niquelado |
| Material de vedação | Perbunan |

Nota

Outras indicações a pedido.

Descrição

For high-speed positioning and stop functions as well as emergency switching (e.g. emergency stop). If a control signal is present at port 3, air can flow to and from the cylinder. If no control signal is present, the air flow to and from the cylinder is shut off, causing the cylinder to stop in the required position. Stop valves are screwed directly onto the cylinder instead of the normal pipe connections.

Artigo

| Descrição | Port 1 | Port 2 | Conexão 3 | B (mm) | C (mm) |
