

# K-AN 302-60

Lock AN 302-60

**HANSA FLEX**

## Características

<b>Aplicação</b>	Screw locking without pretreatment
<b>Resistência</b>	High strength
<b>Viscosidade</b>	Medium viscosity
<b>Resistente à temperatura</b>	-60 °C to +180 °C

## Nota

Outras indicações a pedido.

## Descrição

High-strength bonding of passive materials such as stainless steel or aluminium, no pre-treatment required. Thermal stability: -60 °C to +180 °C- Reduced assembly time- High strength- Handling strength: just 2 to 5 minutes- Final strength: just 2 to 4 hours- No need for pre-treatment with activator and therefore no additional emissions due to solvents
