

# K-PROFI REINIGUNGSPISTOLE

Professional industrial spray gun

**HANSA FLEX**

## Características

|                          |                                 |
|--------------------------|---------------------------------|
| Pressão operacional      | Max. 24 bar                     |
| Temperatura operacional  | Max. 50 °C                      |
| Fluxo                    | 25 l/min (at 5 bar)             |
| Carcaça                  | Brass with a bare metal surface |
| Guarnição de válvula     | chromium steel                  |
| Revestimento em borracha | EPDM                            |

## Nota

Outras indicações a pedido.

## Descrição

Ideal for cleaning in industry and manual trades. The thick rubber coating provides thermal insulation for the hot or cold water flowing inside as well as impact protection. The flow rate is controllable with the adjustment screw (using a coin). The steel shackle allows the lever to be latched for extended use. Also suitable for drinking water.
