

## Caracteristici

|                          |   |
|--------------------------|---|
| Tip constructiv          | Inel canelat tijă                           |
| Presiune de lucru        | până la 400 bari                            |
| Viteză de alunecare max. | 0,5 m/s                                     |
| Execuție                 | Metric                                      |
| Temperatură min.         | -30 °C                                      |
| Temperatură max.         | 80 °C                                       |
| Medii                    | Uleiuri minerale                            |
| Montaj                   | în nuturi închise A<br>în nuturi deschise B |
| Material                 | PUR   |
| Utilizare                | Instalație hidraulică                       |

| Spaltmaß / Clearance |                  |           |
|----------------------|------------------|-----------|
| Druck bar            | e (mm) EU - EU-I |           |
|                      | d < 60 mm        | d > 60 mm |
| 50                   | < 0,40           | < 0,50    |
| 100                  | < 0,30           | < 0,40    |
| 200                  | < 0,20           | < 0,30    |
| 300                  | < 0,15           | < 0,20    |
| 400                  | < 0,10           | < 0,15    |

## Descriere

Garnitură fără frecare.

Rezistență mare la frecare

Soluție simplă.

## Indicații referitoare comandă

În scurt timp se pot produce garnituri EU cu un diametru de 20 până la 510 mm.
