# K-INLINE-DRG IG M SEKUNDAERENTLUEFT 

Inline pressure regulators, $2 \times$ female thread, self-relieving

Caracteristici

| Presiune de lucru | Max. 25 bar |
| :--- | :--- |
| Domeniu de temperaturi | $0^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$ |
| Carcasă | Aluminium |
| restul pieselor | Stainless steel, nitrile rubber, brass |

## Indicație

Alte date sunt disponibile la cerere.

## Descriere

The majority of pneumatic tools are connected directly to the compressed air supply by means of a quick disconnect coupling, in other words they tend to be supplied with a higher pressure than is actually required. Which increases consumption and leads to tool overload. Added safety is provided by the automatic self-relieving function. If the tool is disconnected from the hose, it continues to work for a short period, even though it has been switched off, owing to the residual pressure that is present on the tool side. <br>Inadvertent operation of the tool can thus lead to serious injuries to the user (tackers or nail drivers can fire up to another ten shots). <br>This effect can be prevented by using the inline pressure regulators, which have a preset pressure determined by the application, thereby achieving energy efficiency and economy.
