## K-INLINE-DRG AG IG M SEKUNDAERENTLU

Inline pressure regulators, female/male thread, self-relieving

# HANSA/FLEX

### Caracteristici

Presiune de lucru	Max. 25 bar
Domeniu de temperaturi	0 °C to +80 °C
Carcasă	Aluminium
restul pieselor	Stainless steel, nitrile rubber, brass

### Indicație

Alte date sunt disponibile la cerere.

#### Descriere

. .. .

The majority of pneumatic tools are connected directly to the compressed air supply by means of a quick disconnect coupling, in other words they tend to be supplied with a higher pressure than is actually required. Which increases consumption and leads to tool overload. Added safety is provided by the automatic self-relieving function. If the tool is disconnected from the hose, it continues to work for a short period, even though it has been switched off, owing to the residual pressure that is present on the tool side. <br/>
br>Inadvertent operation of the tool can thus lead to serious injuries to the user (tackers or nail drivers can fire up to another ten shots). <br/>
br>This effect can be prevented by using the inline pressure regulators, which have a preset pressure determined by the application, thereby achieving energy efficiency and economy.
