

K-ADA HUTPROFIL

Adapter for DIN rail

HANSA FLEX

Caracteristici

| | |
|----------------------------------|---|
| Medii | Filtered, unlubricated or lubricated compressed air. If lubrication is used, it must be continuous. |
| Presiune de lucru | Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard) |
| Presiune de comandă | 3 - 7 bar |
| Domeniu de temperaturi | -10 °C to +60 °C |
| Debit | 200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8) |
| Număr de comenzi | Max. 16 (e.g. 16 spring return valves) |
| Operare auxiliară manuală | Latching (bistable), Monostable (non-latching) version also available on request |
| Putere absorbită | 0.6 W per pilot |
| Tip de protecție | IP 65 |

Indicație

Alte date sunt disponibile la cerere.

Descriere

These compact valve terminals, with a maximum flow rate of 800 NI/min, can be individually adapted to the specific conditions of each application thanks to the wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

Informații suplimentare

Important: The scope of supply does not include a connector. Please order separately.
