

### Свойства

|                  |                              |
|------------------|------------------------------|
| Особые признаки  | Твердость: ок. 77° по Шору А |
| Внутренний слой  | Мягкий ПВХ                   |
| Вставка          | нет                          |
| Наружный слой    | Мягкий ПВХ                   |
| Цвет             | прозрачный                   |
| Температура min. | -5 °C                        |
| Температура max. | 60 °C                        |
| Рабочие среды    | Вода<br>Воздух               |

### Указание

Значения давления относятся к кратковременной нагрузке давлением без скачков давления при +20°C.

### Изделие

| Наименование | Внутренний Ø<br>(мм) | Наружный Ø<br>(мм) | Толщина стенок<br>(мм) | BD* при 20°C<br>(bar) | Длина рулона<br>(м) |
