

# K-DIFFERENZDRUCK-DRUCKFLUSS HANSA

Differential pressure flow meter

**HANSA FLEX**

## Свойства

|                           |                                  |
|---------------------------|----------------------------------|
| Измерительная система     | Differential pressure method     |
| Рабочее давление          | 0 - 16 bar                       |
| Область температур        | 0 °C to +50 °C                   |
| Рабочие среды             | Compressed air, neutral gases    |
| Вывод показателей расхода | Analogue 0 to 10 V or 4 to 20 mA |
| Рабочее напряжение        | 24 В пост.тока                   |
| Дисплей                   | background lighting              |

## Указание

Прочие данные только по запросу.

## Описание

Differential pressure measuring system for detecting changes in flow rate or consumption and measuring leakage and energy efficiency. There is a differential pressure at the sensor as soon as a fluid starts to flow. Fast and accurate measurements can be achieved in this way. This robust instrument in a modern design offers a high level of safety (codable) and requires no maintenance.

## Изделие

| Наименование   | Рабочее давление, бар | Диапазон измерений |
|----------------|-----------------------|--------------------|
| K- 07 25 19 51 | 0 - 16 bar            | 150 - 2000 l/min   |
| K- 07 25 19 52 | 0 - 16 bar            | 200 - 5000 l/min   |
