# K-ADA HUTPROFIL

# Adapter for DIN rail

Свойства		
Рабочие среды	Filtered, unlubricated or lubricated compressed air. If lubrication is used, i must be continuous.	
Рабочее давление	Max. vacuum 10 bar (external pilots), 3 to 7 bar (internal pilots as standard)	
Управляющее давление	3 - 7 bar	
Область температур	-10 °C to +60 °C	
Расход	200 NI/min (Ø 4), 500 NI/min (Ø 6), 800 NI/min (Ø 8)	
Количество сигналов управления	Max. 16 (e.g. 16 spring return valves)	
Ручное вспомогательное управление	Latching (bistable), Monostable (non- latching) version also available on request	
Потребляемая мощность	0.6 W per pilot	
Степень защиты	IP 65	

## Указание

Прочие данные только по запросу.

#### Описание

These compact valve terminals, with a maximum flow rate of 800 Nl/min, can be individually adapted to the specific conditions of each application thanks tot he wide range of functions and various input and intermediate plates. Since each valve terminal is a customer-specific combination of a series of individual elements, the catalogue only lists the available input, intermediate and end plates as well as the different valve discs and the 25-pin multi-pole connectors.

### Дополнительная информация

Important: The scope of supply does not include a connector. Please order separately.
