## K-STOPPVENTILE STECK

Stop valves, ports 2 and 3 with plug connection

Lastnosti				
delovni tlak	Max. 10 bar			
krmilni tlak	1 - 5 bar, depending on operating pressure			
temperatura medija	max. 70 °C			
Vgradna lega	Any. Ring pieces can still be rotated 360° after the valve has been tightened			
tesnilni material	Perbunan			

## Navodilo

Drugi podatki na zahtevo.

## Opis

For high-speed positioning and stop functions as well as emergency switching (e.g. emergency stop). If a control signal is present at port 3, air can flow to and from the cylinder. If no control signal is present, the air flow to and from the cylinder is shut off, causing the cylinder to stop in the required position. Stop valves are screwed directly onto the cylinder instead of the normal pipe connections.
