

## Osobine

<b>Brzina max.</b>	5,0 m/s
<b>Pritiskanje površine</b>	pri 20°C 15 N/mm <sup>2</sup> ; pri 100°C 10 N/mm <sup>3</sup>
<b>Temperatura min.</b>	-30 °C
<b>Temperatura max.</b>	110 °C
<b>Mediji</b>	Mineralna ulja Vodene emulzije
<b>Montaža</b>	postaviti u žleb
<b>Materijal</b>	acetalna smola + stakleno vlakno

## Napomena

Proračun poprečne sile;  $F = p \times D \times L \times n$

F= maksimalna poprečna sila (N)

p= maksimalna površina pritiskanja (N/mm<sup>2</sup>)

D x L= projektovana površina (mm<sup>2</sup>)

n= broj prstenova

## Opis

jednostavna obrada žleba za ugradnju i montaža

Velika nosivost za uranjajuće cilindre.

Pažnja, ne može se koristiti kao graničnik

## Artikal

Naziv	D (mm)	d (mm)	L (mm)
WP 25	25	15	10,0
WP 30	30	20	13,0
WP 35	35	25	13,0
WP 40	40	30	13,0
WP 45	45	35	13,0
WP 55	55	45	16,0
WP 60	60	45	16,0
WP 65	65	55	16,0
WP 75	75	65	16,0
WP 85	85	75	16,0
