K-CHOPPERVERSTAERKER

Chopper amplifier (cabinet mounting)

| Osobine | |
|--------------------|---|
| Nominalni napon | 24 V DC |
| Temperaturni opseg | -10 °C to +75 °C (plug amplifier), -10 °C to +60 °C (chopper amplifier) |
| Kućište | PA |

Napomena

Opis

Ever increasing requirements with regard to quality, precision, productivity, convenience, user friendliness and service represent tough challenges for industrial plant and production facilities. These challenges can only be mastered if physical quantities such as temperature, pressure, force, speed, torque, etc. are optimally adapted to the operating conditions of each installation. Stepless adjustment of these parameters is vital. https://document.com/speed/five-proportional valves allow the medium to be varied as a function of an electronic input variable. https://document.com/speed/five-proportional valves allow the medium to be varied as a function of an electronic input variable. https://document.com/speed/five-proportional a function of an electronic input variable. https://document.com/speed/five-proportional a function of an electronic input variable. https://document.com/speed/five-proportional valves control the output pressure in a closed control loop proportionally to the selected setpoint signal. This output pressure, in other words, is continually compared with the specified setpoint and automatically adjusted according to actual parameter values.
