

K-GRUNDEJEKTION SBP-C ELK

Basic ejector »SBP-C« with blow-off valve and electronic vacuum switch, with integrated silencer

HANSA FLEX

Özellikler

Özellikler	Vacuum generator with a single nozzle, available in six power ratings, with a high maximum vacuum value (85%) Connection of compressed air and vacuum with push-in coupling Basic housing with connection facility for a vacuum switch Maximum suction capacity with minimum compressed air consumption Minimum size, low weight Various power ratings for optimised air consumption
------------	---

Uygulama	For universal use in handling systems with very high dynamic movements Handling all kinds of air-tight components For use in separation systems where space is restricted. Construction of ejector blocks for centralised or decentralised individual control of suction pads.
----------	---

Meme sistemi	Brass
Bağlantı	Push-in coupling
Susturucular	Plastic
Temel cisim	Impact-resistant plastic

Açıklama

Diğer bilgiler, istek üzerinedir.

Açıklama

Purely pneumatic vacuum ejector that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.
