

### Özellikler

Özellikler	<ul style="list-style-type: none"> <li>Vacuum generator with integrated control valves and system monitoring functions</li> <li>Gripping and blowing off can be controlled without the need for external valves</li> <li>Optimised air consumption thanks to many models with differing suction capacities</li> <li>Minimum energy costs in continuous operation</li> <li>Easy adjustment with foil keypad, LED display of the settings</li> <li>Minimum size and low weight</li> <li>Optimum vacuum generation directly on the suction pad</li> <li>Complete solution for very simple installation</li> <li>Short learning curve thanks to "teach" function</li> <li>No need for additional sensors</li> <li>Easily visible status indication</li> </ul>
------------	---

Uygulama	Ideal where space is restricted and for highly dynamic movements, handling with industrial robots, linear axes, pick-and-place systems
Tahliye derecesi	85 %
Temel cisim	Anodised aluminium
Entegre olarak	NC blow-off valve, filter, silencer, non-return valve

### Açıklama

Mini-sensor with housing and connection cable, analogue or digital output signal. Minimum size and low weight combined with high measuring accuracy. Diğer bilgiler, istek üzerinedir.

### Açıklama

Purely pneumatic vacuum generator that operates on the Venturi principle. Compressed air enters the ejector at A and flows through the nozzle B. This results in a vacuum immediately behind the nozzle outlet, and air is drawn in through the vacuum inlet D. This air and the driving air leave the ejector via the silencer C.

### Ek bilgiler

Important: Order two connection plugs per ejector.
