

K-ZTR POLYAMID

Polyamide DUO hoses

HANSA FLEX

属性

颜色	Blue / black
温度	-60 °C to +100 °C

提示

其它数据应客户要求提供。

描述

DUO hoses made of polyamide PA 12. PA 12 exhibits excellent impact and notched-impact resistance, even at temperatures as low as -60°C, and is resistant to corrosion and suitable for a wide temperature range. It has a low water absorptive capacity and is therefore dimensionally stable if the ambient humidity varies. PA 12 resists greases, oil, fuels, hydraulic fluids, alkalis and salt solutions. Sufficient UV resistance can only be guaranteed if the material is pigmented black! PA DUO hoses are not suitable for use with push-in fittings. Suitable for vacuum up to 12 x 9 mm.

货品

名称	软管内径 Ø (mm)	软管外径 Ø (mm)	Max. working pressure resistance at 23°C (bar)
